ABOUT ME

Software developer specializing in full-stack web development using Python and React. Developed a real-world expense tracking application with a chatbot-based interface and financial dashboard. Interested in backend architecture and building efficient, scalable applications.

EDUCATION

Bachelor of Science in Computer Science

MES Ponnani College, University of Calicut

2023 - 2026

CGPA: 7 (till last semester)

Final Semester Results Awaited

Relevant Coursework: Data Structures & Algorithms, DBMS, Java

VHSE - Junior Software Developer

SSMVHSS EDAKAZHIYUR

2021 - 2023

PROJECT EXPERIENCE

Full-Stack Developer - SmartExp (Project)

Self-initiated

- Developed an AI-powered expense tracking web application using React and FastAPI
- Implemented secure authentication using JWT-based login and authorization system
- Designed RESTful APIs and integrated with a PostgreSQL database using SQLAlchemy ORM
- Built an NLP-based chatbot using TF-IDF and Logistic Regression for intent classification and entity extraction
- Developed a financial analytics dashboard with spending trends, category insights, and Financial Health Score

SKILLS

Languages: Python, JavaScript, Java

Frontend: HTML, CSS, React

Backend: FastAPI, REST APIs

Database: PostgreSQL

Concepts: Data Structures, DBMS, OOP, SDLC, JWT

Authentication

Tools: Git, GitHub, Postman
